

ANTI-WASTE INCINERATION CAMPAIGN

It's been reported in your Newspapers, on your TV and on the Internet! Now you can come and learn from *an expert* about:

- **How waste incineration** (waste technology with the highest CO₂ emissions, toxic fly ash etc.) **in Gloucestershire affects your health, wealth and environment**
- **The environmentally friendly, cost effective, non-toxic alternatives to ask G.C.C. to use**

Join us for a ***Free Public Presentation***

on Thursday 4th February 2010 at King's Stanley Village Hall,
Broad St., King's Stanley, Nr. Stroud, Glos. GL10 3HZ
from 7:30pm to 9:30pm to hear

Dr. Paul Connett,

Professor of Chemistry,

St. Lawrence University, New York

Dr. Connett has researched waste management issues for over 14 years (specialising in the dangers posed by incineration and in the safer & more sustainable non-burn alternatives). He has successfully opposed the building of waste incinerators in the USA. His **Zero Waste & Sustainability** talk to the **UN** on 12.01.2010 was so successful that they now want to work further with him.

Organised by: **GlosAIN, GlosVAIN, & Glos. FOE Network**, Supported by **SWARD** (Independent environmental groups campaigning against Waste Incineration in Glos.) **Contact/Info:** www.Glosain.org.uk
